Statistics graduate (GPA 3.44, Second-Class Honors) with hands-on experience in data analysis, machine learning, and business operations. Experienced in analyzing sales, inventory, and operational data to generate actionable insights. Skilled in Python, SQL, Excel, and Power BI, with the ability to translate data into practical business decisions. Familiar with AI-assisted tools to enhance data analysis efficiency. Seeking a Data Analyst or Business Analyst role.

EDUCATION

Graduated April 2026

Kasetsart University, Bangkhen Campus

Bachelor of Science in Statistics

Related Coursework: Statistical Data Analysis, Machine Learning, Predictive Modeling, Nonlinear Regression, Classification Techniques, Optimization Methods, Data Visualization, Big Data Analysis

GPA: 3.44 Second-Class Honors

EXPERIENCE

Business Operations Assistant (Family Business)

2025

- Managed sales transactions and ensured data accuracy using POS system
- Analyzed sales and operational data using Excel to identify trends, customer behavior, and product performance
- Supported inventory planning by monitoring stock levels and analyzing sales patterns
- Evaluated revenue, cost, and profit data to generate business insights for decision-making
- Performed basic sales trend analysis and forecasting to support inventory decisions

PROJECTS

Machine Learning Projects (Python)

- Developed end-to-end machine learning models for classification and regression tasks, including churn prediction, and demand forecasting
- Performed data preprocessing, feature engineering, and model selection using Decision Tree, Random Forest, and XGBoost
- Achieved strong performance (e.g., XGBoost Accuracy: 0.80, F1-score: 0.72; Random Forest Accuracy: 0.75)
- Evaluated models using MAE, MSE, RMSE, R^2 , and cross-validation techniques to ensure robustness
- Identified key drivers and patterns from data to generate actionable insights for decision-making

Excel Data Analysis, Visualization & Optimization (Excel, VBA)

- Performed data analysis and cleaning using Excel (Pivot Tables, Power Pivot)
- Built interactive dashboards to visualize key insights and support decision-making
- Applied Excel Solver for optimization and business problem-solving
- Developed VBA automation for insurance premium calculation, reducing manual errors

PageRank Algorithm Analysis (Network Analysis)

- Implemented PageRank algorithm with teleportation to evaluate node importance in a network
- Applied the model to an IMDb actor network to analyze influence relationships
- Identified Robert De Niro as the most influential actor based on PageRank score

SKILLS

Technical Skills: Excel (Pivot Tables, Power Pivot, Solver, Data Analysis, VBA), Power BI (Dashboard Development, Data Visualization), SQL (JOIN, GROUP BY, Query optimization, Data cleaning), Python (Pandas, NumPy, scikit-learn), Statistical Tools (R Studio, SPSS, SAS, Minitab)

AI-assisted data analysis: Using LLMs (e.g., ChatGPT, Gemini, Claude) for data cleaning, exploratory analysis, feature engineering, and workflow automation

Soft Skills: Analytical Thinking, Problem-Solving, Communication, Adaptability

Languages: Thai (native), English (Intermediate)
